

Quality

We design and build your Ford to feel as good after many years of service, as it did the day you picked it up. And to drive just as beautifully, too.

Sustainability

Using advanced technology, we're committed to creating vehicles with improved fuel economy, reduced CO₂ emissions and a lower overall cost of ownership.

Safe

Ford's Intelligent Protection System uses sophisticated technology designed to help prevent an accident and, if one should happen, to help protect you.

Smart

Vehicles with smart, intuitive technologies designed to connect you to your world and many clever solutions from Ford that make life a little easier.

3 Year/100,000km Warranty¹

Covers your Mustang against defects in factory materials or workmanship for the first 36 months or 100,000 kms – whichever comes first.

Service Intervals¹

Your vehicle requires servicing when the OIL CHANGE REQUIRED message appears in the information display; or 15,000 km after the previous service; or 12 months after the previous service, whichever occurs first.

Ford Roadside Assistance¹

For the first 36 months, Ford gives new Mustang owners complete peace of mind motoring with New Zealand's most reassuring roadside emergency service. Free accommodation or a free rental car are just some of the outstanding features of this unique service.

Five Year Perforation Corrosion Warranty¹

Covers the original vehicle's body against perforation corrosion for the first five years of its life.

Ford Customer Assistance Centre

You'll always find us responsive to your needs. Telephone 0800 FORD NZ (0800 367 369).

Finance and Lease Options

Choosing how to finance your vehicle is a major decision – My Ford Finance can get you the Ford you want, when you want it. Fully maintained or non-maintained operating leases remove the worry

of depreciation, inflation and more importantly do not tie up your capital in an asset. Other forms of financing are also available. Flexible deposits and repayment terms mean that a plan can be structured for your specific needs. See your Ford Dealer to discuss your financing or leasing requirements.

MY FORD FINANCE

Ford Solutions

You deserve to have a worry-free journey every time you set off in your Ford. Ford Solutions provide you with a 'no problems' solution tailored to suit your lifestyle. The range of services includes:

- Motor Vehicle Insurance – Three levels of cover offer you hassle-free insurance coverage
- Guaranteed Asset Protection (GAP) Insurance – Provides cover for the 'gap' between the value of your insurance payout and the amount owing on your finance or lease agreement
- Payment Protection Insurance – Helps protect your payments against unforeseen circumstances, such as redundancy, illness and death
- New Vehicle Extended Mechanical Breakdown Insurance – Acts as an extension of your original Ford warranty
- Extended Roadside Assistance – Extends the premium roadside assistance which is standard on new Ford vehicles

Simply call in and see your participating Ford Dealer today.

¹. Conditions apply. Further information on these warranties and services may be obtained from your Authorised Ford Dealer.

This brochure was designed to provide you with a general introduction to your Mustang and was correct at time of going to print. However, Ford's policy is one of continuous product development. The right is reserved to change specifications, colours and prices of the models and items illustrated and described in this publication at any time. For the latest details always consult your Ford Dealer.

ALL NEW FORD MUSTANG

Go Further

YOUR WILDEST DREAMS

EVOLUTION OF AN ICON

Forward-leaning. Hard-charging. Free-breathing. And incredibly streamlined. Introducing a bold new interpretation of America's legendary pony car. The all new Ford Mustang hits the road running with a sleek, agile body designed for performance.

Designers were challenged to improve Mustang's aerodynamics, while giving it an aggressive, energetic stance. Painstakingly sketched and sculpted, its form was relentlessly refined.

Engineers thoroughly tested the car's performance using advanced technology in the lab and on the road, then provided the designers with feedback.

Performance is enhanced by subtle elements like the wheel aero curtains – vertical slots at the outer edges of the front fascia. They create a high-pressure region that holds airflow closer to the body and minimises drag.

Fastback or convertible, the all new Mustang is a marvel of engineering. The stunning result of form and function flowing seamlessly together. A world-class design. Ready to be unleashed on the world.

POWER PLAYERS

Mustang masters the art of exhilaration with two feats of engineering genius.

Discover a heart of pure power with the mighty 5.0L V8 engine. You'll hear it in the roar, feel it in the torque, experience it in the acceleration. Quite simply, it's the stuff of legends.

If you're into reducing fuel consumption, the twin-scroll turbocharged 2.3L EcoBoost™ engine is your dream ride. It delivers thrilling power and torque with superb economy.

What more proof do you need?

Mustang EcoBoost™

2.3L EcoBoost™: Twin-scroll turbocharger optimised for quick acceleration response

233kW of power and 432Nm of torque¹

1. All performance figures measured using premium fuel (95RON)

Mustang V8

5.0L V8: Engineered to maximise power from every compression

306kW of power and 530Nm of torque²

2. All performance figures measured using premium fuel (98 RON).

SMOOTH MOVES

Mustang's SelectShift gives you the thrill of using a manual transmission with the ease of an automatic. Simply toggle the race car-inspired paddle shifters on the steering wheel to shift gears up or down.

A silver Ford Mustang is shown from a front-three-quarter view, driving on a two-lane desert road. The car is in motion, with a blurred background of rolling hills and a sunset sky. The text 'HANDLES LIKE A DREAM' is overlaid on the right side of the image.

HANDLES LIKE A DREAM

Sudden manoeuvres. Heavy traffic. Challenging road and weather conditions. The all new Mustang offers sophisticated handling technologies that help you maintain control, so your drive can be more carefree.

Mustang's advanced braking system distributes brake force between front and rear wheels, and prevents wheels from locking. The result? Peace of mind, while you enjoy Mustang's pinned-to-your-seat power.

An advanced brake lineup brings Mustang to a stop faster than you can say, "let's go."

Greater handling when you need it most. Electronic Stability Program (ESP) and Traction Control System (TCS) work together to understand changing road conditions and your responses.

Our hot-handling Mustang is ready for action. In fact, it's already proven itself in our most rigorous testing – logging more than 4 million kilometres.

Holds the road with ease thanks in part to its fully independent, integral-link rear suspension. Based on a lower H-arm, a vertical link, an upper camber link and a toe link, this state-of-the-art setup helps Mustang deliver enhanced anti-squat and anti-lift properties. Which gives it better pitch control during hard acceleration and braking.

For even more grip, unsprung mass is kept down by the use of high-strength aluminum alloy for the rear knuckles and H-arms.

Better road feel, a better ride, and more precise handling are just a few more benefits of the all new suspension system, which incorporates a new double-ball-joint configuration up front as well.

DRIVERS: TAP THIS

The all new Mustang serves up hot new technology designed specifically for you. Next time the road starts getting slick, just tap a toggle switch on the dash to adjust its Selectable Drive Modes. And keep going.

Choose from 4 modes: Normal, Sport+, Track, and Snow/Wet. Each one activates predefined powertrain and chassis calibrations suited to that particular driving situation.

Normal mode delivers a balance of comfort and responsive handling for an engaging driving experience.

Sport+ mode provides more responsive steering and throttle response, plus different shift points if your Mustang is equipped with the SelectShift® automatic transmission. It's great for more spirited driving on twisty roads.

Track mode is designed for the motor enthusiast who occasionally hits the track when pure performance is desired. It produces a more powerful engine sound and provides a performance driving experience by allowing the engine to respond directly to the driver.

Snow/Wet mode comes in handy when road conditions take a turn for the worse. It provides confident handling by retaining a connected-to-the-road feel without sacrificing any of the inherent composure of your new Mustang.

HOW SUITE IT IS

When it's time to hit the track do it in style with Mustang's Track Apps suite. The system gives you feedback on what your car is doing, how it's performing, and most important: how you're performing.

For customised steering feedback, the selectable effort electric power-assist steering offers you 3 modes (Standard, Sport and Comfort) in the Steering Feel menu.

You can also monitor g-forces, braking times and acceleration times, all within the Track Apps.

View your performance metrics on a 4.2-inch message centre screen.

TALKS THE TALK

Why stop using your mobile devices when you drive? SYNC® 2 is a fully integrated, voice activation system that lets you use your favourite devices while your hands stay on the wheel, and your eyes stay on the road.

Sync your phone¹ to call your friends, play your favourite music, find the perfect temperature with hands-free climate control, and stay on track with the integrated satellite navigation system. It comes complete with a customisable 8" colour LCD touch screen. And best of all, it can be paired to more than one mobile device.

Once paired, it can download contacts and play music from your smartphone. It can also access your MP3 player, USB or iPod.²

Just touch a button on the steering wheel and say things like "Call: Melanie at home" or "Play playlist: Roadtrip."

No need to hang-up and re-dial. Calls automatically transfer between your headset and SYNC® when you get into or out of your car.

1. Depending on your mobile phone. For phone and media compatibility, please visit www.ford.co.nz/sync
2. iPod is a trademark of Apple Inc. Please refer to ford.co.nz for iPod compatibility.

LIFE SHOULD BE EASY

So we've made yours a little easier. Keyless entry and push button start let you get in and start your Mustang with less effort. And MyKey® technology helps younger drivers keep their minds on the road.

We can't find your keys for you, but as long as you have the key fob on you, you're ready to go. Keyless entry allows you to unlock the driver's door with a touch of the handle. To start her up, just put your foot on the brake, press the start/stop button and you're away.

Ford's MyKey® technology gives parents of younger drivers peace of mind by reducing distractions and limiting speed. It enables vehicle owners to limit stereo volume, increase the frequency of seat belt reminders, and block incoming phone calls and text messages while other drivers are behind the wheel.
