Go Further

Classy yet powerful

The design of the All-New Mondeo is alive with details. As you'd expect, a car of this class also puts a priority on ensuring high levels of control and protection.

Overseas Titanium model shown.

It looks powerful but refined, classic yet contemporary

Putting a priority on high levels of comfort and protection, the All-New Mondeo presents detail that is purposeful and finely crafted.

Overseas Titanium model shown. Manual transmission not available in New Zealand.

Make it yours

Complement your unique style with a choice of colours that make it your own.

Lunar Sky

1. Bluetooth® is a registered trademark of Bluetooth SIG., and is used under license. 2. Available on Trend & Titanium models only. 3. Premium Tri-Coat paint will incur an additional cost. Only available on Titanium models.

SYNC²

SYNC² is a fully integrated, Bluetooth[®] voice activated system, which lets you use your favourite devices while your hands stay safely on the wheel. Sync your phone to call friends, play your favourite music, control the climate control and use the satellite navigation.

Rear inflatable seatbelts

Extra protection for your passengers in the back seat – they distribute the force of an impact across a wider area of the torso and help support the head and neck.

MyKey[®]

MyKey[®] allows you to limit speed, keep the music volume down and stop incoming text messages, so younger members of the family concentrate on driving, not their phone.

SelectShift with paddle shifters

Wanting the ease of an automatic doesn't mean you have to give up the thrill of driving a manual. Steering wheel mounted paddle shifters let you shift through gears smoothly and effortlessly, without having to use a clutch.

Dual zone climate control

Everyone's idea of comfort is different. Our dual zone climate control allows you and your front passenger to choose the climate for your own personal space, so everyone's happy.

Adaptive Cruise Control²

Sensors scan the traffic ahead, updating vehicle positions 20 times a second, so if the traffic slows, so does your speed. And when it clears, you return to your pre-set speed.
