

NEW FORD **FOCUS** RS

Go Further

Focus RS Features

Brute Power.

The Focus RS redefines power. The specially designed 2.3L EcoBoost™ engine outputs up to 257kW of power and 440Nm of torque,¹ giving you performance that's truly next level.

Just say the word.

Access your mobile, your music, satellite navigation and even change the cabin temperature without touching a dial thanks to SYNC®2. The intuitive voice controlled system lets you stay focused on what's important. Your drive. See all your drive information, entertainment options and climate control in stunning colour with the 8" touch screen.

RECARO® Sport Seats.

Strap yourself in. Sporting the lighter racing shell seats from the world-famous RECARO® brand, drivers will always feel connected to the RS.

Superior Design.

When it comes to the design of the Focus RS, every detail has a purpose. Careful aerodynamic optimisation of the front splitter, rear spoiler and underbody eliminates lift forces. The striking, angular lines deliver balanced performance with zero lift front and rear, for ultimate high-octane handling.

Optional Performance Wheel Pack.*

The high-performance lightweight 19" forged design wheels, finished in low-gloss black, offer enhanced strength and impact resistance with a weight saving of 600g per wheel. Wrapped in Michelin Pilot Cup Sport 2 tyres.

Bi-Xenon Headlights.

The Bi-Xenon lights not only automatically turn themselves on and off with changes in natural light, they also help you see around corners. Standard headlights are usually fixed on one spot, but the Bi-Xenon lights change the beam's level and bend around corners so they're always on the road.

A SMALL LESSON IN POWER

The RS badge is reserved for the best of the best and this car is no exception. All-Wheel Drive with Dynamic Torque Vectoring delivers new levels of handling capability and driver enjoyment, while the 2.3L EcoBoost™ engine outputs up to 257kW of power. Add sports tuned suspension, Brembo brakes and anti-roll bars and you've got a performance machine that puts its peers to shame.

Driver Select Mode.

The Focus RS is full of cutting edge performance technologies including Drive Modes and Launch Control. With four selectable Drive Modes geared for optimum performance on the road or circuit, the extreme driving capabilities of the RS are easy to unleash.

Take control.

Dive in and out of corners with agility and precision. The Focus RS utilises the Ford Performance All Wheel Drive system bringing you unprecedented levels of handling, traction and grip.

S = Standard

1. All performance data measured using 98RON fuel. 2. These results are obtained from controlled tests conducted by Ford Motor Company to Australian design rule ADR81/02. The actual fuel consumption you achieve will depend, however, on many factors including your driving habits, the prevailing conditions and your vehicle's equipment, condition and use. 3. When in use, do not exceed 80km/h and ensure that a new wheel and tyre are fitted as soon as possible. 4. Bluetooth® is a registered trademark of Bluetooth SIG Inc., and is used under licence. Customer should consult their Ford Dealer on the ability of their mobile phone handset to integrate with the Bluetooth® system prior to making a purchase decision. 5. For SYNC®2 compatibility, visit www.ford.co.nz/sync 6. Rear outboard seats only.

This brochure was designed to provide you with a general introduction to your New Focus RS and was correct at the time of going to print. Ford's policy is one of continuous product development and the right is reserved to change model line-up, specifications and colours of vehicles illustrated and described in this publication at any time. For the latest information always consult your Ford Dealer.
